Why CampusCrowd?

Finding the money and the right team members as a student to bring your life-changing project into the spectrum can be quite challenging. It is rather unfortunate that there aren't enough venture capitalists or any form of reliable traditional funding opportunities for students which has crippled a lot of brilliant ideas.

Moreover, heavy interest rates on Bank loans makes it an-out-of-scope option for students looking for funds to bring their projects or startups to live

This where CampusCrowd comes in, We create an ecosystem of like-minded people who provide both financial and technical support for your project. Instead of counting on a one time big supporter, we focus on measured support call PERKS from your friends, course mates, loved ones, the Staff and others who show interest in your visio

CampusCrowd
